

Availability

Please search the list of EZRC zebrafish lines at <http://ezrc.kit.edu/catalog.php> for available lines, or download it as a text file from <http://ezrc.kit.edu/downloads/catalog.txt>.

We ship all zebrafish lines as bleached embryos. Adults are available for wild-types and some other lines.

Search the list of plasmids at http://www.herbi.kit.edu/search_menu.php. Plasmid DNA is provided as a dry spot on a filter paper, to academic customers only.

Ordering

Official orders are placed by sending the completed and duly signed order form to EZRC-Requests@kit.edu. Go to "View shopping cart" on the website to generate a filled EZRC order form, or download a blank order from http://ezrc.kit.edu/downloads/EZRC_Order_Form.pdf.

Product Categories

WT embryos: Provided in quantities of 200.

WT adults: Provided in quantities of 5 pairs.

Tg/mut embryos: Provided in quantities of at least 30 (up to 120 depending on fertilization success), generally from an IVF or outcross against AB wild-type females. In some cases an incross may be performed. Information on the type of cross will be provided with the shipment.

Sanger embryos: Provided in quantities of at least 30 (up to 120 depending on fertilization success), from an IVF or outcross against AB wild-type females. If not enough embryos are generated by IVF and not enough sperm samples are available to retry, we will instead grow up the line and ship embryos from identified carriers when they are ready. This may increase shipping time to 4 months or more. Note that we cannot reduce your price in this case.

Tg/mut adults: Identified adults provided in quantities of 3 pairs.

Plasmid: 5 µg of plasmid DNA provided as a dry spot on a filter paper, to academic customers only.

Snail eggs: Eggs of *Planorbella sp.* provided in quantities of 100.

Additional items available on request:

Sanger adults: Identified adults provided in quantities of 3 pairs.

Introduction to IVF/sperm freezing: A 1-day introduction for 2 participants.

Sperm cryopreservation and storage: For 1 line, includes preparation of 6 samples, IVF testing of one sample and 5 years storage of the remaining samples.
